## Optical parameters

The vario optics of the CTratio allows a smooth focusing of the optics to the desired distance.

The following tables show examples of measurement distances and the corresponding measurement spot sizes.

The sensors are available in two versions:

**Standard-focus vario optics (SFV):** adjustable 300 mm till infinity

**Close-focus vario optics (CFV):** adjustable 150 mm till 350 mm

Alternatively you can use the [optris Spot size calculator](#) or the [optris optic calculator app](#).
